How We Take the Market

Spain first: practical nutrition, exercise and recovery—through channels we can measure.

THE OFFER Expert photo guides, recipes, workouts and recovery programmes. Wearables are optional.

DIRECT TO CONSUMER

Be useful. Be discoverable.

Founder and expert content, creators, social networks, search and app stores.

Test paid acquisition. Scale what retains paying customers.

Measure: payer CAC + retention

TRUSTED PROFESSIONALS

Build productive locations.

Dietitians, trainers, gyms and studios; reviewed clinician-led programmes.

Start locally; develop hospital and primary-care routes next.

Measure: active locations + conversions

ORGANISATIONS & BRANDS

Turn access into use.

Employer and university programmes; sports and fashion retail; events and wearable ecosystems.

Sell access and programmes—not private health data.

Measure: seats used + renewals

ATL / DIGITAL AWARENESS › **BTL: EVENTS, ROADSHOWS, MALLS** › **FIRST ACTION → PAYMENT → REPEAT USE**

A connected campaign, not three separate funnels. Prospective channels and partners; no agreements implied.

From Reach to Paying Customers

A bottom-up professional-channel illustration—not a percentage of a large market.

40 productive locations × 30 invitations / month × 9 active months

10,800	›	4,320	›	2,592	›	648
Eligible invitations		**Registered users**		**Activated users**		**New paid subscriptions**
Not a patient database		40% of invitations		60% of registrations		25% of activated users

Build a live pipeline—not just a partner logo list.

Candidate → signed → invitations → activation → payment / renewal.
Track cohort age and churn. Invitations are not customers.

THE SCALE GATE

≤ €30

Target fully loaded cost per new paying customer

At €6 monthly net revenue, 75% contribution margin and 5% monthly churn, simple lifetime contribution is €90.

A hypothesis to validate—not an achieved KPI.

648 = gross new subscriptions over the assumed active period, before subsequent churn. Channel illustration excludes paid-media acquisition.

We Move Ahead. Capital Changes the Pace.

Our commitment is founder-led. Funding changes scope, speed and the amount we can do in parallel.

OPERATING BRIDGE

€15–25K

~90 days of scoped work

Keep a focused programme moving.

Cloud costs and essential product fixes.
Reviewed food + exercise guides.
Pilot support and priority legal work.

Substantial founder execution; not a fully salaried organisation.

LAUNCH & VALIDATION

€250–350K

Proposed 12-month programme

Prove the early commercial route.

Small delivery team and core quality.
Richer food + exercise content.
Measured direct and partner pilots.

Concentrated Spain execution; not simultaneous country launches.

CONTROLLED ACCELERATION

€2–5M

Two distinct 24-month designs

Build and test in parallel.

Product, content and channel capacity.
Larger evidence-gated campaigns.
Safety, pregnancy and market reviews.

€2M: establish repeatability.
€5M: extend capacity and selected pilots.

We continue within our own committed capacity and cash—even if external funding takes longer.

Amounts are not additive. A bridge conversion is not new cash in a later round. Horizons require a dated cash plan.

What €2M or €5M Would Accelerate

Same proposed 24-month horizon. More capital buys parallel execution—not a shortcut around validation.

CAPABILITY	€2M | Spain repeatability		€5M | Parallel delivery	
Product + cloud	**€520K**	Reliable app, integrations and operations	**€1,150K**	Parallel delivery and stronger regional readiness
Food, exercise + recovery	**€240K**	Recurring expert-led visual production	**€600K**	Deeper programmes and selected localisation
Marketing + distribution	**€650K**	Prove campaigns and productive partners	**€1,950K**	Replicate proven channels; build network capacity
Safety + pregnancy evaluation	**€180K**	Specialist co-design and a bounded pilot	**€500K**	Dedicated development and broader evaluation
Legal + country readiness	**€160K**	Compare markets and complete readiness reviews	**€350K**	Prepare selected countries and approved pilots
Operations + contingency	**€250K**	Administration and €150K uncommitted reserve	**€450K**	Administration and €250K uncommitted reserve
TOTAL	**€2,000K**		**€5,000K**	

All-in spending envelopes before customer receipts. Staff and contractors are included in each function; no double-counted team budget.

Spain First. International by Evidence.

The business is cloud-delivered. Product, legal and commercial readiness still determine where we launch.

DAYS 1–90

Prove the first useful journey

Release quality and reviewed content.
Small direct + partner pilots.
Activation, support and retention data.

Gate: usefulness, safety and early retention

MONTHS 4–12

Build a repeatable Spain route

Active locations and renewing accounts.
Test acquisition against contribution.
Scale only the routes that work.

Gate: viable economics + delivery capacity

MONTHS 13–24

Replicate selectively

Expand proven Spain channels.
Develop a reviewed pregnancy mode.
Prepare selected country pilots.

Gate: clinical + country readiness + cash

AUSTRALIA

Test partner demand, content fit and local pricing before committing to launch.

SINGAPORE

Lucía's PR status and digital contacts support introductions and eligibility checks.

EVERY NEW MARKET

Legal, claims and privacy; contracts, tax, localisation and cloud controls.

Australia and Singapore join—not replace—European / other options. No grant, partnership or country launch is assumed.

The Investor Return Case

Create value through retained revenue, repeatable distribution and disciplined capital use.

€2M	**€10M**	**20% → 15%**	**5 years**
Illustrative investment	Hypothetical post-money	After 25% ownership dilution	Illustrative holding period

Equity proceeds available*	Investor proceeds	Gross multiple	Annualised return
€0	€0	**0.00×**	-100.0%
€5M	€0.75M	**0.38×**	-17.8%
€20M	€3.00M	**1.50×**	8.4%
€50M	€7.50M	**3.75×**	30.3%

Returns depend on terms and outcomes—not on the size of the cheque alone.

*Pro rata equity distributions after company-level obligations; no preferences or investor taxes/fees modelled. Total loss and illiquidity are possible.

Where the Growth Budget Goes

An integrated content-to-customer campaign, with spending released only when the route works.

ACTIVITY	€2M	€5M
Paid digital, search & app-store tests	€180K	€650K
Creators, ambassadors & campaign rights	€70K	€220K
BTL: events, roadshows, retail & malls	€70K	€200K
ATL: local awareness, media & PR	€40K	€180K
Searchable editorial / organic discovery	€30K	€80K
Opt-in lifecycle & referrals	€20K	€40K
Growth operations & experiments	€40K	€80K
MARKETING TOTAL	**€450K**	**€1.45M**

EAT, MOVE, RECOVER —YOUR WAY

CREATE Chef + dietitian + trainer: useful visual guides.

ACTIVATE Gym, sports / fashion retailer, event or mall.

CONVERT First app action, opt-in follow-up, optional payment.

LEARN Compare retained users and fully loaded acquisition cost.

Content-library production and partner account teams are separately budgeted. This is a channel menu and spend ceiling—not a plan to activate everything.

Growth Assumptions—not a Forecast

The model must expose the acquisition gap, not hide it behind a larger funding round.

ILLUSTRATIVE OUTPUT	€2M	€5M
Gross new B2C payers over 24 months	4,752	15,924
B2C subscriptions active at month 24	~3,183	~10,665
Active B2B contracts at month 24	10	30
Contracted B2B seats at month 24	2,000	7,500
Monthly recurring revenue at month 24	~€26.1K	~€90.2K
Annualised endpoint recurring run rate	~€313K	~€1.08M

These outputs do not demonstrate break-even at the proposed programme spending levels.

No opening payers; new B2C payers spread over months 7–24; 5% monthly churn. €6 B2C net/month; €3.50 per contracted B2B seat.

PAID-MEDIA STRESS TEST

€75.76

Media-only cost per new payer

€5 per registration ÷ (55% activation × 12% paid conversion)

1.19× lifetime contribution / media CAC.
Before acquisition overhead.

Redesign before committing the full paid-media budget.
