

Nutrisync Design System

Hormonal care made easy — sync your cycle, fuel your mind.

V2 · SEPTEMBER 2026

WHAT THIS IS

One system, three surfaces, reverse-engineered from real code.

Marketing web (v2)

nutrisync-web2 PWA: Home, Community
(4 doors + joins), Our Story. Fixed Figma
frames, everything in rem (1rem = 10px @
frame width).

Mobile app (v1)

Expo/React Native. Calendar · NutriLog ·
Cycle · Movement · Progress; onboarding
wizard, settings, meal photo AI, wearables.

Also in the repos

v1 webapp, internal ops Hub, legal pages —
documented, not rebuilt.

Sources: [githubjuanjose/nutrisync-proyecto](#) (repos/web2, primary) · [nutrisync-web](#) · [nutrisync-app](#) (src/theme.ts) · local Figma screen exports — sync state tracked in [github.md](#)

TWO BRAND GENERATIONS

v2 is the default. v1 stays one attribute away.

v2 comes from the new marketing site (repos/web2, faithful to Lucía's Figma). v1 is the original app + Design site, preserved as a token theme: wrap any subtree in **data-theme="ns-v1"**.

v2 — Web 2.0 brand

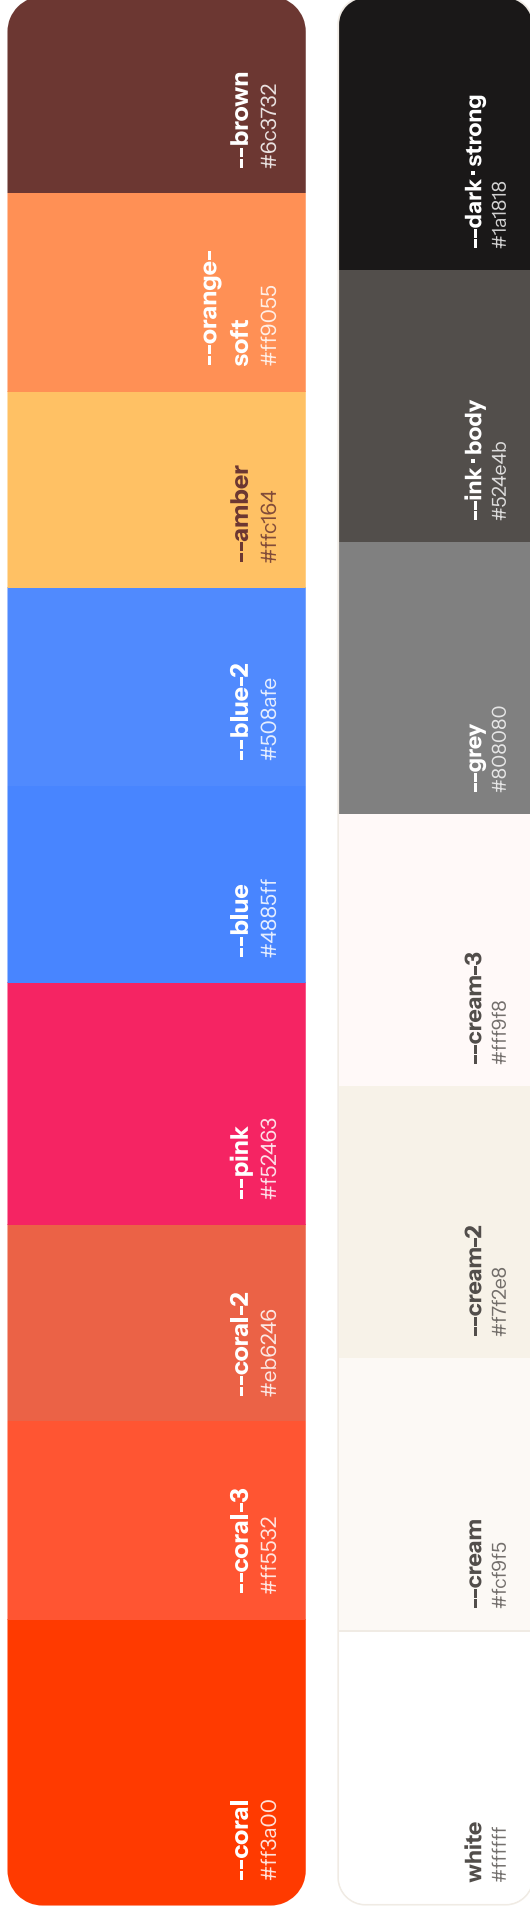

Poppins 400 display · Instrument Sans UI · photography-led

v1 — original app & site

Poppins app UI · Bricolage Grotesque web display · peach washes

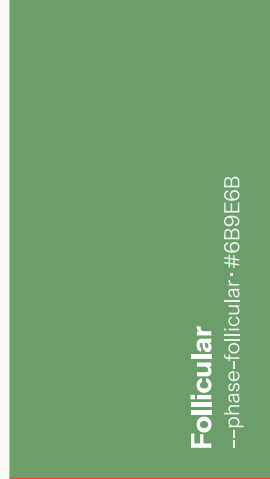

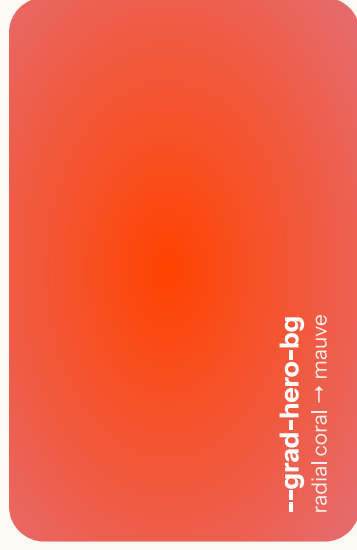

Coral is the brand.

Semantic aliases ship too: --accent → coral · --accent-alt → pink · --text-body → ink · --surface-cream · --card-pink · --scrim. Shadows are always brown-tinted, never grey.

COLOR • GRADIENTS & PHASES

Warm glows, four phases.

Cycle phases per developer spec §2.2 — shared by both generations. Status: ■ --good #3DBE8B ■ --warn #ffc164 ■ --error-soft #ffe1d6

TYPOGRAPHY · DISPLAY

Nutrition that **mooooves** with your
Cycle

4 phases. 1 boody.

--f-display: Poppins at **weight 400** — **never bold** · --fs-hero 70px / 0.9 / -0.03em · --fs-statement 110px / 1.12 / -3px

Display is always sentence-case or a short declarative; the playful stretch ("mooooves") is part of the voice.

€4.99_{/mo}

Community

Ditch the cycle trackers, get your money's worth.

Phase-synced nutrition & movement guidance

BADGE 12 / 600 / CAPS

--f-ui: Instrument Sans — price 80/700 · nav 25/600 · body-lg 23 · body 18/16 · note 15/500

Lucia · Mapi · Pilar

Glacial Indifference — Sync your cycle. **Fuel your mind.**

--f-hand: Reenie Beanie handwritten names · --f-alt: Glacial secondary · --f-inter: Inter internal

Nutrition that moves with your cycle.

Welcome to **NutriSync**

v1: --f-display-v1 Bricolage Grotesque 600–800 web display · --f-app Poppins-only app (h1 38/500, titles 26/700, body 15)

CONTENT & VOICE

Direct, warm, a little cheeky.

"Ditch the cycle trackers, get your money's worth."

"4 phases. 1 body."

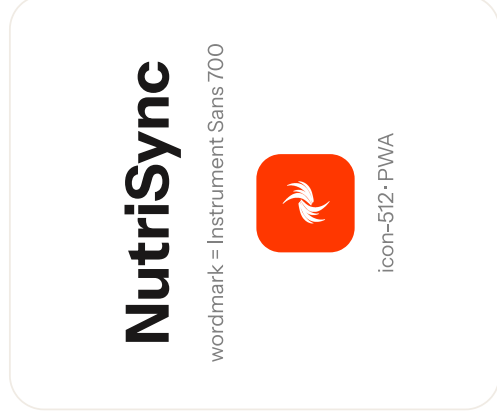

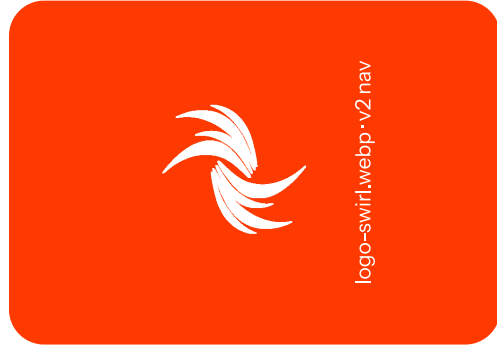

"WE DESERVE BETTER THAN GUESSWORK"

"You're here because your body deserves better than guesswork."

Speaks to **you**; the brand is "we". Sentence case everywhere, UPPERCASE only in small badges; app buttons go lowercase ("log today"). Branded compounds: NutriLog, NutriScore, MovementLog. Numbers lead ("500+ on the Waitlist"). No emoji in product copy — custom Nutri characters instead. EN first, ES catalog maintained. A dark disclaimer bar rides along wherever pricing shows: pilot prices are illustrative.

BRAND MARKS

The swirl-wings. Wordmark in type.

No lookup file exists in the sources — wherever a lookup is needed, set "NutriSync" in Instrument Sans 700 next to the mark. Never redraw the swirl.

ICONOGRAPHY & CHARACTERS

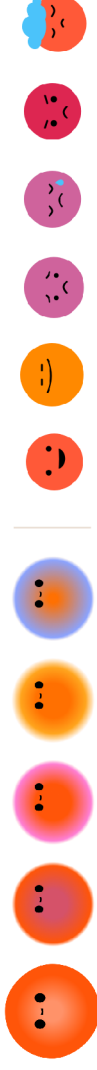

No icon fonts. No emoji. Exported assets and characters.

Web SVGs + store chips

Per-icon SVG exports; v1 web used a Lucide-style 24px line set. Store marks live in brown #6c3732 chips, r12.

Nutri mascots & mood emotes (app)

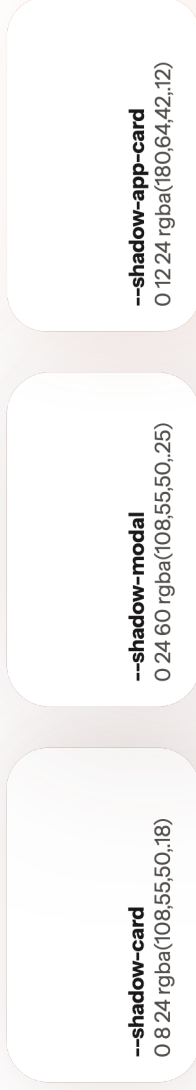

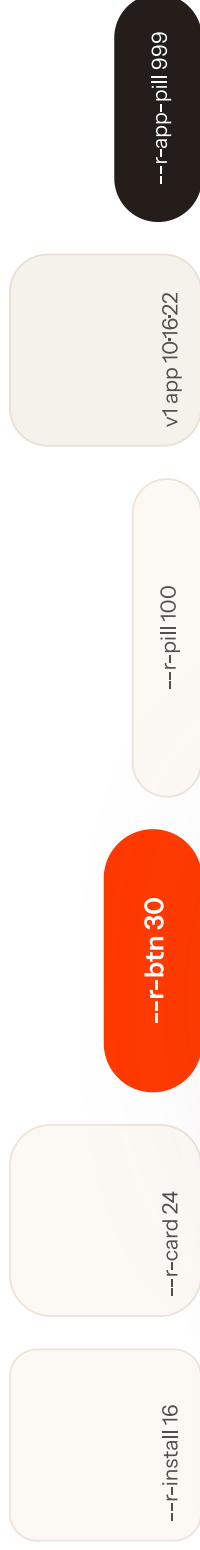

Approved PNG set: orb mascot, 4 Nutri avatars (red/pink/yellow/blue), 12 mood emotes, tip characters. Never redraw them.

App tab glyphs — fat-line SVGs with baked captions (Calendar · NutriLog · Cycle · Movement · Progress), active #E4572E / inactive #B8ADA4, 50px in the floating pill bar.

Imagery — warm, editorial, women-centric photography with coral/pink cast; rgba(0,0,0,.2) scrim under white text; white line illustrations over photos.

SHAPE • RADIUS, SHADOW, SPACING

Pills everywhere. Warm shadows only.

Spacing: app = 4px grid (--sp-1...--sp-20, spacing(n)=n×4, screen padding 20, tab bar h62 r32). Web2 = exact per-frame rem values (1rem = 10px @ 1440/1495/390/393), 80px gutters — never snapped to a 4/8 grid.

COMPONENTS • WEB (V2)

10 primitives from components.css + the Figma gen.

Headache

Rings & data: PhaseRing (signature dish + hill waves) · ScoreRing ·

SuccessRing · HormoneChart · StreakDots · AppProgressBar

Inputs: AppButton · ChipGroup · SelectList · WheelSheet (barrel picker) · LanguagePicker

Surfaces & feedback: PeachBg · GraceBanner (grace/drift/care) · WearInvite · LoadingView · BioLock · GoalOrb + carousel

Navigation & identity: TabBar + NavIcon glyphs · SettingsIcon (17 line icons) · NutriAvatar · NutriOrb

Exact theme.ts values: coral #E8472A · gradient #F5641E → #FF9142 · pill 999 ·

4px grid · warm card shadow.

Daily Tip

Progesterone rises and your metabolism revs up — magnesium and B6 take the edge off PMS.

The flow, playable.

ui_kits/app/index.html walks the real journey: Welcome (peach radial, wings, language pills) → onboarding (progress head, GoalCarousel, chips) → the tab bar app: **Cycle** (PhaseRing + GraceBanner + WearInvite), **NutriLog** (week strip, Daily Tip / Body Insight, Nutri Basics checklist, TODAY'S MEAL, "log today"), **Progress** (ScoreRing, streaks, hormone curves). Matched against the Figma screen exports in refs/.

USING THE SYSTEM

One stylesheet in, everything on.

styles.css — tokens + self-hosted fonts (Poppins, Instrument Sans, Inter, Glacial, Reenie Beanie, Bricolage)

tokens/ — colors · typography · radius & shadows (v1 via data-theme="ns-v1")

components/web · components/app — 30 React primitives with .d.ts + .prompt.md

ui_kits/web · ui_kits/app — full-screen recreations

guidelines/ — 15 foundation specimen cards

assets/ — logos, imagery, mascots, icons, fonts

export/nutrisync.tokens.json — W3C tokens for Figma (Tokens Studio) ·

SKILL.md — agent entrypoint

Ground rules

Coral #ff3a00 leads; pink seconds; blue is a section accent.

Poppins display at weight 400, never bold. Pills everywhere (24/30/100). Warm brown shadows only — never grey.

Photography warm and editorial; mascots in the app. Keep the pilot disclaimer near any pricing. No emoji, no icon fonts — exported SVG/PNG assets only. Copy exact values; never snap to a 4/8 grid on web.
